The Pride

Power:

Standard setup (up to 200 people) requires 4 separate 15 amp circuits (this does not mean 4 wall plugs) located not more than 20 feet from the stage. An additional circuit per hundred extra people may be required for a larger sound system.

Stage:

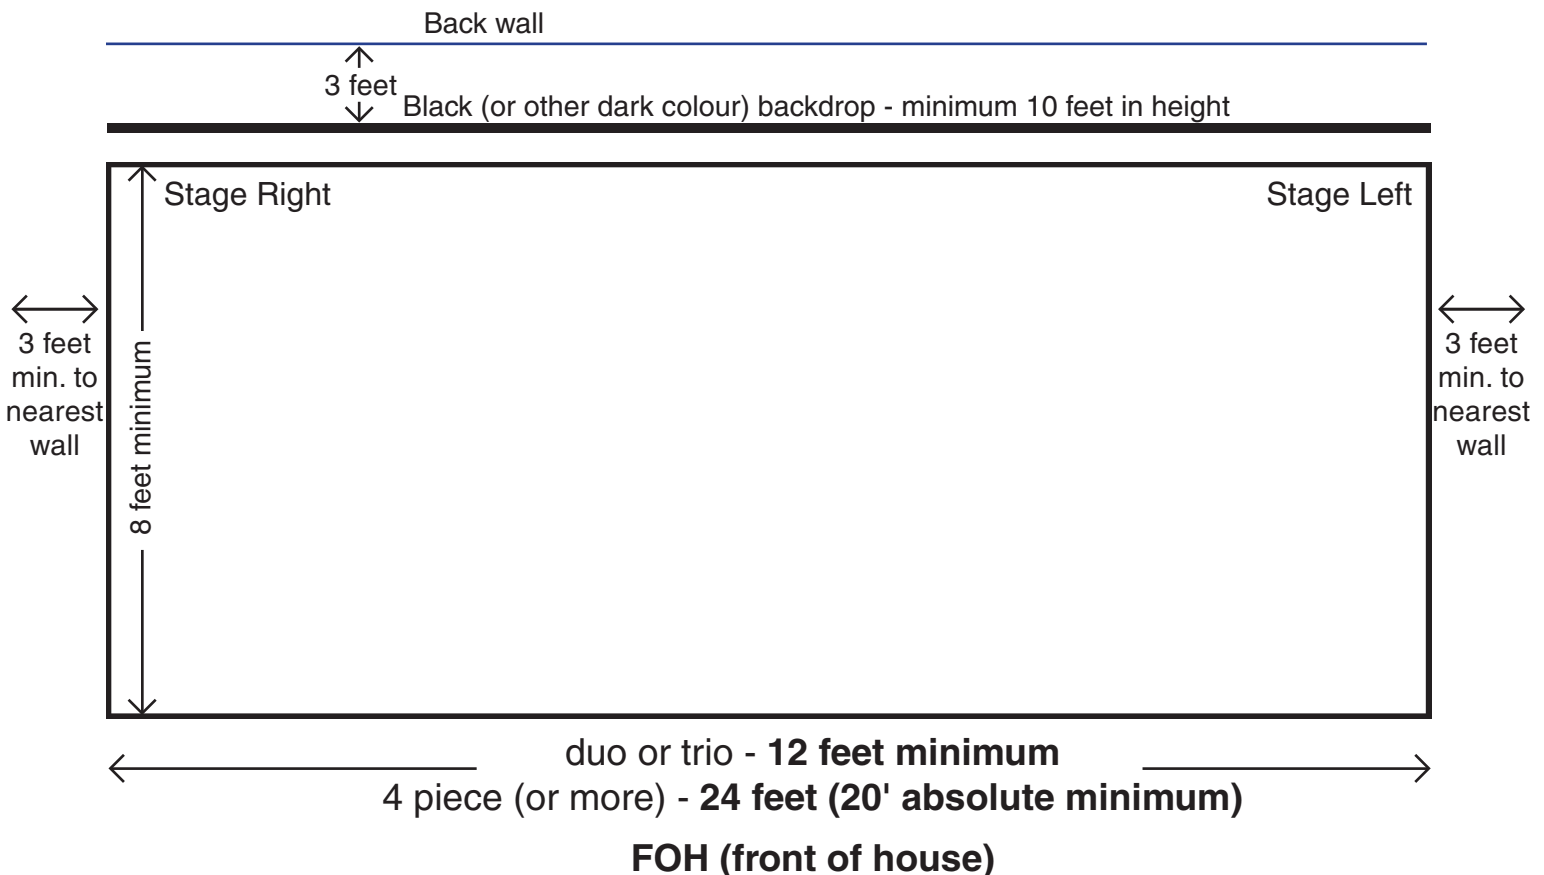

Standard stage size is 24'x8' and should be at least 1 foot high. Under tight circumstances a 20'x8' stage is acceptable. A black (or other dark colour) backdrop should be in place and must be at least the entire width of the stage and a minimum of 10 feet high. Under certain circumstances, special theme decor (other than backdrop) is acceptable.

Dressing Room and Meals: *(assumes a 4 piece band - modify accordingly)*

A clean, comfortable & brightly lit room, with a mirror, for a minimum of 4 people. Comfortable chairs (4 minimum) and table, bottled water and coffee to be available from 2 hours before show time. A hot meal for 4 is to be served no later than 1 hour before show time. If the meal must be served after the commencement of the show, it is understood that a 45 minute break (normal breaks are 15 - 20 minutes) will be required so that the Band may eat.

Special Requests:

1. Stage and power to be in place three hours prior to doors opening. Dressing room to be ready one hour prior to performance.
2. Any Band parking fees shall be paid or reimbursed by the Purchaser.
3. Hotel Rooms: When applicable to be paid in full by Purchaser prior to check in.
